

PC-HD DESKTOP CONTROLLER

Designed with high quality in mind, the PC-HD Desktop Controller is perfect for industrial applications where video and/or image capture is imperative.

The controller is compatible with all PC-HD series cameras and is available in multiple configurations including standard, instant on, instant on with lights, and a portable unit with battery life up to 8 hours.

Features include real-time viewing and video recording with still image capture, full playback abilities and storage capacity up to 128GB with a removable micro-SD card. Capabilities also include file control, resolution control, video segmenting, exposure control, light frequency control, illumination control, and output selection. All units feature mini-HDMI output, USB connectivity, analog video output and are constructed of rugged anodized black aluminum with non-slip rubber feet.

Available models:

PC-HDVRCU - Standard Camera Control Unit

PC-HDVRPCU - Portable Camera Control Unit

PC-HDVRCUI - Instant On Unit

PC-HDVRCUIL - Instant On with Lights
