

# PC-XD SERIES DESKTOP CONTROLLER

Introducing the PC-XD Series Desktop Controller for use with the complete line of PC-XD series cameras. These control units have a built-in DVR for recording, image capture and playback to viewing device via HDMI or CVBS output. On board memory slots on the rear panel allow for up to 1TB of storage. The front panel features a joystick and playback controls as well as an option for an LED adjustment knob. The enclosure is constructed of rugged anodized black aluminum with non-slip rubber feet. Additional features include a locking power connector and remote control. The controller comes ready to plug in any of the PC-XD series cameras. With the ability to be located up to 60 meters (200 feet) from the camera head, this device is a highly capable solution for remote viewing.
